SUMMARY

Full Stack Developer with 2+ years of production experience building scalable **Node.js** backends, **REST APIs**, and real-time applications. Proficient in Node.js, **Express.js**, **PostgreSQL**, **MongoDB**, **React**, and **SQL**, with hands-on experience in **RAG**, **LLM** applications, vector search, and **LangSmith**-based evaluation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C#, SQL, HTML5, CSS3

Backend & Databases: Node.js, Express.js, PostgreSQL(pgvector), MongoDB, Mongoose, Drizzle ORM, WebSockets(Socket.io), RESTful APIs

AI & LLM: RAG Architecture, LangSmith (Tracing & Evaluation), Claude Code, Cursor

Frontend: React, Redux Toolkit, TanStack Query (React Query), Tailwind CSS

Cloud & DevOps: AWS (EC2, S3, Lambda, API Gateway, DynamoDB), Vercel, Netlify

Testing & Tools: Jest, Postman, Git/GitHub, JIRA, Agile/Scrum

EXPERIENCE

Associate Developer

Novac Technology Solutions

Aug 2024 – Present

Chennai, Tamil Nadu, India

- Created **Node.js REST APIs** for chat, conversations, Text-to-Speech (TTS), and Speech-to-Text (STT) features for training applications.
- Developed **WebSocket** services for real-time STT communication between the backend and VR application.
- Built APIs for uploading and managing 3D models and assets, which were consumed by a Unity-based VR frontend.
- Worked with a 10-member cross-functional team to develop and deliver an enterprise e-learning platform.

PROJECTS

DocuLens - Evaluated RAG Pipeline | [GitHub](#)

- Engineered an end-to-end RAG platform using **PostgreSQL (pgvector)** and Gemini, indexing technical product manuals to deliver streaming, grounded question answering.
- Benchmarked vector retrieval depth across top-*k* configurations, cutting Time-To-First-Token (TTFT) by **18%** and overall generation latency by **11%**.
- Architected an automated evaluation suite via **LangSmith** and **LLM-as-a-judge**, benchmarking a 20-sample golden test set to achieve **100%** retrieval recall, **95%** faithfulness, and **85%** factual correctness.
- Implemented nested distributed tracing across embedding generation, SQL cosine distance queries, and stream chunks, isolating model API latency from sub-**10ms** database lookups.

Tru Kanban | [Live](#) | [GitHub](#)

- Designed and built a full-stack Kanban app with Node.js, Express, React, and **PostgreSQL (Drizzle ORM)**, handling multiple concurrent query transactions.
- Implemented drag-and-drop card/list management (**Dnd Kit**) with optimistic updates via **TanStack Query**, eliminating redundant refetches.
- Built a tokenized invite system with real-time multi-user collaboration using **Socket.io** room management

EDUCATION

RGUKT Ongole

Bachelor of Technology, Mechanical Engineering

Ongole, Andhra Pradesh

Jul 2019 – May 2023

CERTIFICATIONS

Career Essentials in **GitHub Professional Certificate** | [GitHub](#) and [LinkedIn](#) | 2026

Career Essentials in **Generative AI** | [Microsoft](#) and [LinkedIn](#) | 2026

Become a **Prompt Engineer** | [Educative](#) | 2026

Claude Code in Action | [Anthropic](#) | 2026
